Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.
2. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.
3. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.
4. Group I, claim(s) 1-10 and 36, drawn to a Fe-Cr-Al stainless steel sheet.
5. Group II, claim(s) 11-14 and 37, drawn to a Fe-Cr-Al stainless steel sheet having protrusions.
6. Group III, claim(s) 15-20, drawn to a Fe-Cr-Al stainless steel sheet having isolated interior gaps and used as exhaust honeycomb body.
7. Group IV, claim(s) 21-23, drawn to a Fe-Cr-Al stainless steel sheet having thickness and several other specifically claimed properties and used as exhaust honeycomb body.
8. Group V, claim(s) 24-35 and 38, drawn to a process of making a double-layered sheet having a Fe-Cr-Al stainless steel sheet layer.
9. Group VI, claim(s) 39-42, drawn to a process of making an exhaust honeycomb body having a Fe-Cr-Al stainless steel sheet.
10. The inventions listed as Groups I-VI do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons. The groups of inventions are linked only in the matter of a Fe-Cr-Al stainless steel sheet of high Al content comprising the claimed relative of amounts of Cr, Al, and Fe, as set forth in Claim 1, for example. However, this subject matter is disclosed in Hasuno JP 04-350148 and Kawai JP 2-86848. See Hasuno (Abstract; claims; paragraphs 1, 9, 12, and 16). See Kawai (Abstract; page 3, upper left column, lines 6-12; page 3, lower right column, lines 17-19; and page 5). See, also, analysis of ISR. As such, there is no corresponding special technical feature among the claim groups. Lacking unity of invention, the claim groups are appropriately subject to a restriction requirement.

11. Due to the complexity of the restriction requirement, a telephone call was not made to Mr. Kelly on 1 August 2007 to request an oral election to the above restriction requirement.
12. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
13. The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
14. Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
15. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship

must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
